INTERNSHIP

Flutter App Development at Howin Cloud Solutions pvt ltd (Dec/2023 to May/2024)

NillQ-doctor consulting booking app - Flutter

It's an online appointment booking app for patients . They can search by hospitals or doctor's name and book appointment through the app and doctor can create slots for his consulting.

PROJECTS

CRM PROJECT - ANGULAR, NODEjs, MySQL

It is a solution designed to monitor and make the most of the Field Sales Team and generate proper and required Analytical reports for the Management. It consists of charts of live sales, users list , customer list, Attendance ,Reports of all activities(daily activity) ,custom reports for accounting section, multi-level process list.

Online Shopping App - ANGULAR, NODEjs, MySQL

It is a solution for Small and Medium Enterprises who can bring their products to customers. Its a Ready to Use Solution. For an organisation which has 50 outlets, App1 will be useful for managing all their customers, administrators,Sales and Orders.

Quiz App - React.js , Node.js , MongoDB

It's an interactive platform for users to participate in quiz and create quiz for other users . In this app users can select quizs but categories and subjects . And users can create quiz by manually or by suggesting a topic and number of questions then AI will generate quiz questions and answers automatically. Users can see their history and leaderboard and check their performance
